Low pass LC filters for VPLL and VPHY

USB VBUS Filter

Voltage Regulator

Decoupling capacitors

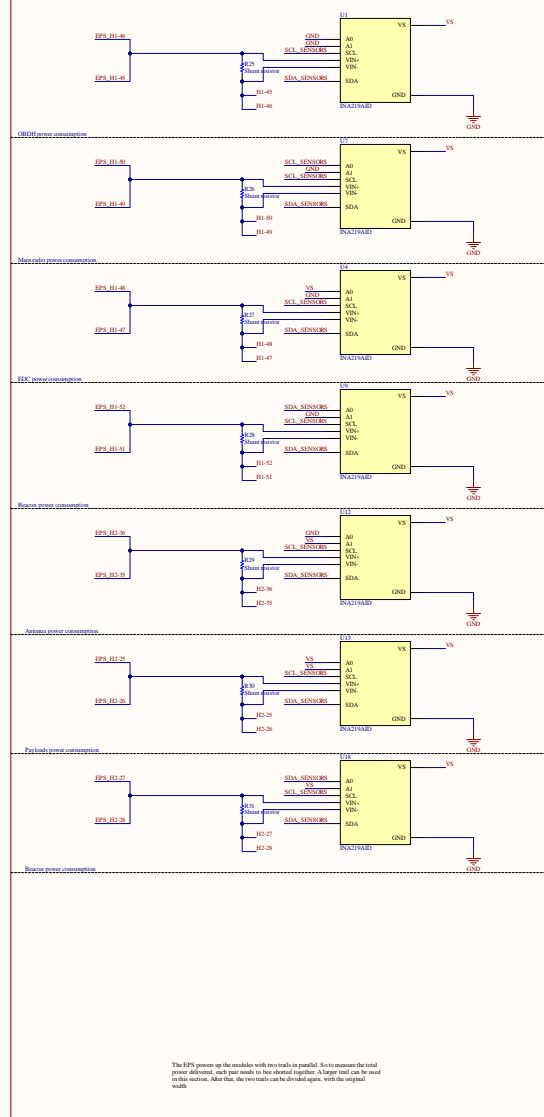

Debug interfaces

Redundant pin header

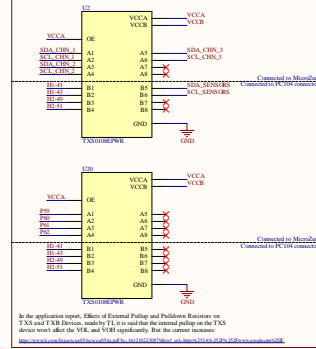

Current sensors

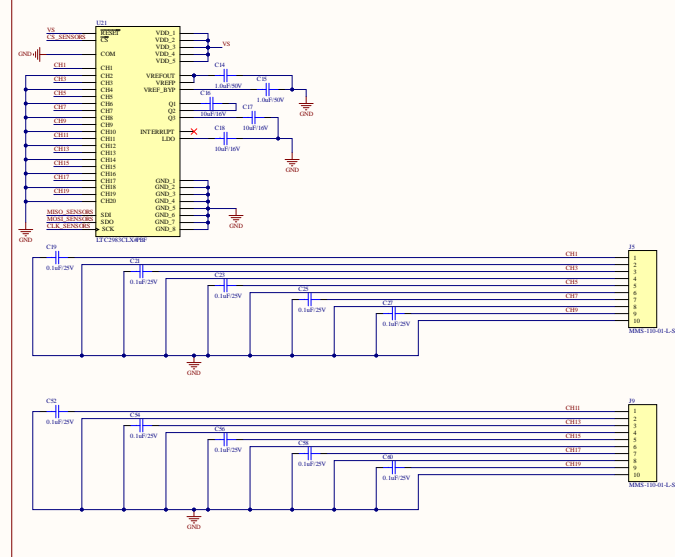

The GPS power up the modules with two leads in parallel. So to measure the total power delivered, each pair leads to be shorted together. A larger rail can be used in the system. After that, the two leads can be disconnected, with the original width.

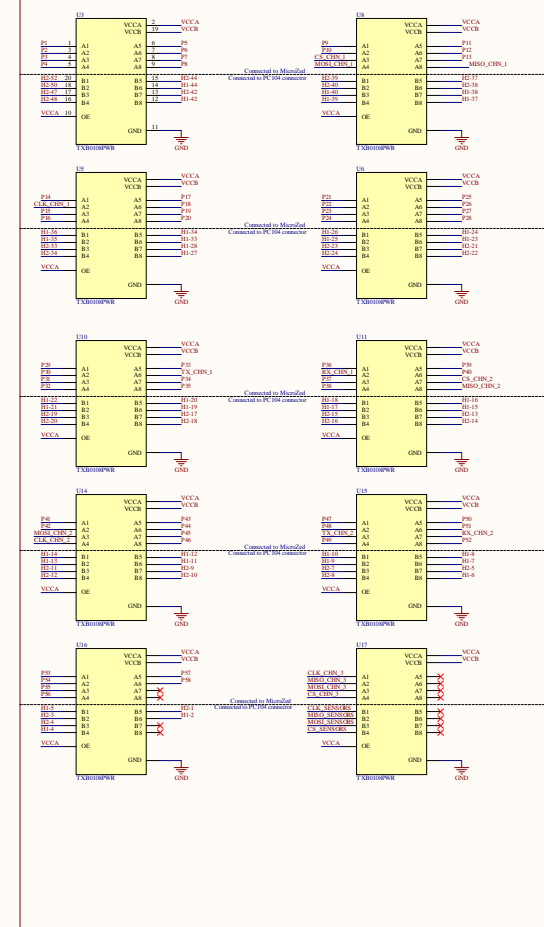

Bidirectional voltage-level translator for PC

Components temperature measurement system

Generic bidirectional voltage-level translator

RS485 module

Ambient temperature measurement system
